Enviro Bac-2
Disinfectant – Cleaner – Mildewstat – Sanitizer – Virucide*

ACTIVE INGREDIENTS:
- Alkyl (C14-16) 60%, C16 30%, C12 5%, C18(5%) dimethyl benzyl ammonium chloride
- Alkyl (C12-14, C14-16) dimethyl ethylbenzyl ammonium chloride

5.0% 5.0%

INERT INGREDIENTS:
- Active solution: 1 gallon
- 200 ppm: 0.125 ounces 0.25 ounces

5.0 ounces

EPA Registration No. 10324-63-6838
ESTABLISHMENT 63833-CA-01
KEEP OUT OF REACH OF CHILDREN
DANGER
PELGRO

1. If swallowed, give 1 to 2 cups of water for 15 minutes. If on skin, wash immediately with plenty of water. Rinse in eyes with water for 15 minutes. Remove contact lenses, if present. If after the first 5 minutes, then rinse continually for 15 minutes. Call a poison control center or doctor for treatment advice.
2. If inhaled: Get fresh air. If not breathing, give artificial respiration. Preferably, yellow mucosal damage may contraindicate the use of gastric lavage.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
DANGER. Corrosive. Causes irreversible eye damage and skin burns. Harmful if swallowed or absorbed through the skin. Do not get into eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves and protective clothing when handling. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove contaminated clothing and wash before reuse.

ENVIRONMENTAL HAZARDS
This product is toxic to fish and aquatic invertebrates. Do not discharge effluent containing this product (Product Name) into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollution Discharge Elimination System (NPDES) permit, or the authority has been notified in writing prior to discharge. Do not discharge effluent containing this product (Product Name) into sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

PHYSICAL OR CHEMICAL HAZARDS
Do not use or store near heat or open flame. Do not mix with oxidizers, anionic soaps and detergents.

NET CONTENTS: 5 GALLONS

DIRECTIONS FOR USE
It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Before using this product, food products and packaging materials must be removed from the room or carefully protected.

DISINFECT PERFORMANCE IN INSTITUTIONS (Hospitals, Dental Offices, Nursing Homes, and Other Health Care Institutions) and NON-MEDICAL FACILITIES:
- At 4 fluid ounces of this product per 5 gallons of water use level (or equivalent use dilution) (250 ppm active) and with a 10-minute contact time, this product is bactericidal according to the (AVAC Use Dilution Test) method on hard non-porous surfaces in a simulated patient environment, followed by a post-activity test (AATCC 108-1981, Procedure 8) in the presence of 5% of organic material. Sanitizing solution must not be reused for sanitizing, but can be reused for other purposes such as cleaning. To SANITIZE MOBILE HARD NONPOROUS ITEMS (such as glassware, utensils, cookware and dishes, drinking glasses and eating utensils): Scrape and pre-wash utensils to remove food and coagulate, disperse and other mobile non-porous type items, use the 200 ppm solution for one minute. Rinse the items to prevent cross contamination. Use the 200 ppm solution for at least 1 minute, rinse to remove life. HEMP is a very potent soil. Do not rinse. A fresh solution must be prepared at least at daily, or when solution becomes visibly dirty. Use the sanitizing solution must not be reused for sanitizing, but can be reused for other purposes such as cleaning.

SANITIZING SHELL EGGS INTENDED FOR FOOD PROCESSING:
- Sanitize fresh-prepared non-porous articles using a solution of 1/2-1 ounce of this product per 5 gallons of water (200-400 ppm active). This method should be used in the presence of 5% of organic material. Sanitation solution must not be reused for sanitizing. Sanitized shell eggs may be sold as raw eggs, pasteurized egg, or egg products. Use in food processing and/or food production.

MOLD AND MILDEW CONTROL DIRECTIONS:
- At 4 ounces per 5 gallons of water use level (or equivalent use dilution) (375 ppm active) and with a 10-minute contact time, this product is bactericidal according to the AVAC test method on hard non-porous surfaces in a simulated patient environment, followed by a post-activity test (AATCC 108-1981, Procedure 8) in the presence of 5% of soil. For heavily soiled areas, a 5% soil will effectively inhibit the growth of mold and mildew and reduce objectionable musty odors. For heavily soiled articles, use a 1/2-1 ounce of this product per 4 gallons of warm water (200-400 ppm active). The solution must be warmer than the eggs, but not to exceed 130°F. Wet eggs thoroughly and allow solution to drain. Eggs sanitized with this product must be subjected to a potable water rinse only if they are to be broken immediately for use in the production of a food product. Eggs may be held by broilers, but may not be immersed. For eggs used in foods, use at least 200 ppm active. Sanitize shell eggs intended for food processing and/or food production.

PREPARATION OF DISINFCTION/VIRUCIDAL/FUNGICIDAL USE SOLUTION:
For heavily soiled areas, a preliminary cleaning is required. Add 4 ounces with 5 gallons of water (or equivalent use dilution) (250 ppm active) to disinfect hard, non-porous surfaces. Apply solution using a brush, sponge, mop, cloth, auto scrubber, mechanical spray device, coarse pump or trigger spray device or by immersion so as to thoroughly wet surfaces. For spray applications, apply 8-10 inches from surface. Do not breathe spray. Rub with brush, cloth, or sponge. Treated surfaces must remain wet for at least 10 minutes. Rinse using 8-10 inches of water from solution. This product is not for use on medical devices. INTERNAL DISINFECTANT DIRECTIONS (Hospitals, Dental Offices, Nursing Homes, and Other Health Care Institutions): For heavily soiled areas, a preliminary cleaning is required. For disinfecting hard, non-porous surfaces such as floors, walls, countertops, bathroom areas, laboratory areas, garbage cans, partitions, pipes, with a 1/4 ounce of this product per 5 gallons of water (625 ppm active) to disinfect hard, non-porous surfaces. Apply solution to surfaces, thoroughly wetting surfaces with a brush, cloth, mop, sponge, auto sprayer, mechanical spray device or by immersion. For sprayer applications, spray 6-8 inches from surface. Do not breathe spray. Rub with brush, cloth, or sponge. Treated surfaces must remain wet for 10 minutes. Wipe using excess liquid. Change cloth, sponge or towels frequently to avoid redeposition of soil. For heavily soiled areas, a 1/2 ounce of this product per 4 gallons of water (1250 ppm active) solution application of this product. It is a violation of Federal Law to use this product for medical use. INTERNAL DISINFECTANT DIRECTIONS: (Hospitals, Dental Offices, Nursing Homes, and Other Health Care Institutions): For heavily soiled areas, a preliminary cleaning is required. For disinfecting hard, non-porous surfaces such as floors, walls, countertops, bathroom areas, laboratory areas, garbage cans, partitions, pipes, with a 1/4 ounce of this product per 5 gallons of water (625 ppm active) to disinfect hard, non-porous surfaces. Apply solution to surfaces, thoroughly wetting surfaces with a brush, cloth, mop, sponge, auto sprayer, mechanical spray device or by immersion. For sprayer applications, spray 6-8 inches from surface. Do not breathe spray. Rub with brush, cloth, or sponge. Treated surfaces must remain wet for 10 minutes. Wipe using excess liquid. Change cloth, sponge or towels frequently to avoid redeposition of soil.

STORAGE AND DISPOSAL: Do not contaminate food, water, or feed by storage and disposal. PESTICIDE STORAGE: Store only in original container. Keep this product under locked storage sufficient to make it inaccessible to children or persons unfamiliar with its proper use.

STORAGE AND DISPOSAL:
- Do not contaminate water, food, or feed by storage and disposal.
- Pesticide wastes are acutely hazardous. Improper disposal of excess pesticides, spray mixture or residue is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste Program, U.S. Environmental Protection Agency, Washington, D.C. 20460.

CONTAINER HANDLING: Non-Refillable Container. Do not reuse or refill this container. Triple rinse container promptly after emptying. Triple rinse containers: Fill the container 1/4 full with water and recap. Shake for 10 seconds. Drain for 10 seconds after the flow begins to drip. Follow Pesticide Disposal Instructions for residue disposal.

DOT: UN1903, Disinfectant Liquid Corrosive (Quaternary Ammonium Compound), 8, PGII

For heavily soiled, areas, a preliminary cleaning is required. Add 4 ounces with 5 gallons of water (or equivalent use dilution) (250 ppm active) to disinfect hard, non-porous surfaces. Apply solution using a brush, sponge, cloth, mop, auto scrubber, mechanical spray device, coarse pump or trigger spray device or by immersion so as to thoroughly wet surfaces. For spray applications, apply 8-10 inches from surface. Do not breathe spray. Rub with brush, cloth, or sponge. Treated surfaces must remain wet for at least 10 minutes. Allow to dry. Rinsing of floors is not necessary unless they are to be waxed or polished. Rinse all treated surfaces that come in contact with food such as countertops, appliances, tables and stovetops with potable water before reuse. Change cloth, sponge or towels frequently to avoid redeposition of soil. For heavily soiled, NON-POROUS SURFACES AGAINST AVIAN INFLUENZA A VIRUS: For use in hospitals, homes, hotels, motels, schools, offices and other non-human use sites, follow the INSTITUTIONAL DISINFECTANT DIRECTIONS.
