

FLOOD GUARD 2

Beaded floor treatment

Properties

FLOOR GUARD 2 is a unique beaded peracetic acid/hydrogen peroxide-based floor treatment and cleaner designed to eliminate cross-contamination on floors in production rooms, cool rooms, freezers, cold storage areas, and anywhere there is foot or forklift traffic. The beads are air-dried and low density. The weight of a shoe or tire will burst the bead, releasing the active ingredients and coating the tire or shoe. This product is 100% biodegradable.

Applications

Floors may be wet or dry before addition of FLOOR GUARD 2, depending on the conditions of its intended use. FLOOR GUARD 2 is completely water soluble and dissolvable, and leaves no particulate residue after rinsing. You may use this product undiluted by first wetting the surfaces and spreading this product. When the Flood Guard 2 comes into contact with moisture in the air or on shoes, tires, etc., the product generates hydrogen peroxide and peracetic acid which is ideal for preventing cross-contamination.

Physical Properties

Color	White beads
pH (1%)	9.5-10.5
Biodegradability	100%
Phosphorous content	0%

Directions for Use

For 'normal' or medium use applications broadcast the FLOOR GUARD 2 at the rate of 0.5-2 lbs per 100 sq ft. of floor. In high traffic areas, such as forklift lanes, broadcast FLOOR GUARD 2 either manually, or by using a hand-held mechanical spreader (which yields a more uniform application) at the rate of 2-3 lbs per 100 sq ft. of floor area. Reapply 1-3 times per week or as needed.

Packaging

This product is available in 25 lb. pails and 30 gal open head drums. Larger sizes available on request.

Important: Read and understand label and Safety Data Sheet (SDS) for complete listing of hazards, precautions, first aid statements, and storage and handling information. SDS are available from the distributor of this product. 24-Hour Emergency Response Line 1-800-424-9300.
