**Re: Food Contact Substance Notification (FCN) 001384
Final Letter**

Dear Mr. Harvey:

This letter is in reference to the notification for the food contact substance and use described as follows:

Food Contact Substance (FCS)

An aqueous mixture of peroxyacetic acid (CAS Reg. No. 79-21-0), hydrogen peroxide (CAS Reg. No. 7722-84-1), sodium hydroxide (CAS Reg. No. 1310-73-2), and glycerine (CAS Reg. No. 56-81-5)

Notifier

Enviro Tech Chemical Services, Inc.

Manufacturer/Supplier

Enviro Tech Chemical Services, Inc.

Intended Use

As an antimicrobial agent added to process water or ice used for preparing whole and cut meat and whole or cut poultry products, including hides, parts, trim and organs, and for processing fruits and vegetables.

Limitations/Specifications

The final process water or ice used for washing, rinsing, cooling, or otherwise for processing will not exceed: 1) 400 ppm peroxyacetic acid and 100 ppm hydrogen peroxide for whole or cut meat products, 2) 1000 ppm peroxyacetic acid and 250 ppm hydrogen peroxide for whole or cut poultry products, 3) 2000 ppm peroxyacetic acid and 500 ppm hydrogen peroxide for poultry post-chiller or dip tanks prior to air chillers, and 4) 350 ppm peroxyacetic acid and 87.5 ppm hydrogen peroxide for fruits and vegetables.

This is to inform you that as of March 6, 2014, FCN 001384 will become effective. It will be added to the list of effective notifications for FCNs, which is available on our website:

<http://www.fda.gov/Food/IngredientsPackagingLabeling/PackagingFCS/Notifications/default.htm>

The Agency has determined that allowing this notification to become effective will not have a significant impact on the quality of the human environment and, therefore, an environmental impact statement is not required. The agency's finding of no significant impact (FONSI) and the evidence supporting that finding, contained in an environmental assessment, will be publicly available after the effective date of the notification.

This effective notification is applicable only to the subject FCS manufactured by the listed manufacturer/supplier, and is limited to the use of the FCS identified above. You should inform the agency of any modification in the FCS limitations/specifications given in the notification or of any alteration in the manufacturing process that would result in a change in the impurities in the FCS. Such changes may require submission of a new notification.

FDA's review of this notification was limited to Section 409 of the Federal Food, Drug, and Cosmetic Act (FFDCA). The existence of an effective notification for a FCS does not relieve use of the subject substance from compliance with any other provision of the Federal Food, Drug, and Cosmetic Act or with 21 CFR § 174.5 General provisions applicable to indirect food additives. For example, in accordance with section 402(a)(3) of the Act, use of the FCS should not impart odor or taste to food rendering it unfit for human consumption.

Section 301(l) of the FFDCA prohibits the introduction or delivery for introduction into interstate commerce of any food that contains a drug approved under section 505 of the FFDCA, a biological product licensed under section 351 of the Public Health Service Act or a drug or biological product for which substantial clinical investigations have been instituted and their existence has been made public, unless one of the exemptions in section 301(l)(1)-(4) applies. In our review of this notification, FDA did not consider whether section 301(l) or any of its exemptions apply to the intended use of the food-contact substance. Accordingly, allowing this food-contact substance notification to become effective should not be construed as a statement that the intended use of the food-contact substance would not violate section 301(l).

If new data or information becomes available to FDA demonstrating that the intended use of the FCS is no longer safe, the agency will inform you of its determination that the intended use of the FCS is no longer safe. In addition, if you become aware of data that raise questions about the safety of the intended use of the FCS, you should notify the agency immediately and be prepared to supply data necessary to resolve the questions.

If you have any questions concerning this matter, please do not hesitate to contact us.

Sincerely,

Vanee Komolprasert, Ph.D., P.E.
