Peragreen® WW (Antimicrobial Solution)
EPA Number: 63838-2

Applications
Peragreen® WW is a peroxyacetic acid-based microbiocide developed for algae and microbial control in wastewater treatment systems. Use this product to treat sewage and wastewater effluent systems associated with public and private wastewater treatment plants. This product may be applied alone at any point in the treatment train, such as debulking control, or may effectively be used in conjunction with other systems, such as Ultra Violet (UV) light.

Properties
Peragreen® WW has a high oxidation potential and is very reactive. It exhibits excellent bactericidal and fungicidal activity against a wide range of microorganisms in cold or warm water. Product is stable for a minimum of 1 year under normal conditions. It ultimately degrades to oxygen, water, and acetic acid (vinegar).

Chemical Composition
Peragreen® WW is an equilibrium mixture of peracetic acid, hydrogen peroxide, acetic acid, proprietary ingredients, and water.
