

WWTP Testing Sample Collection Procedure

Sample Collection

Collect a 1 gallon sample of water (prior to any pre-existing disinfection methods or at the desired injection site for PAA) using a dip stick and the provided sealable plastic containers

Shipment Preparation

1. Seal container and place into plastic bag and twist-tie or seal shut to limit spills
2. Place sealed bag into the provided Styrofoam cooler
3. Fill cooler with provided cooling packs (be sure to activate) and surround the sealed sample bag
4. Seal the Styrofoam cooler with cover and packaging tape to ensure containment.

Shipment

1. Take package to your nearest carrier (USPS, UPS, or FedEx)
2. Ship overnight to the below address:
Enviro Tech Chemical Services
ATTN: Joseph Donabed
500 Winmoore Way
Modesto, CA 95358
3. Notify your point of contact of its shipment and provide tracking number

Efficacy Testing

Efficacy testing will be conducted immediately following the reception of the sample and a full report will be provided within a week.
