**IF INHALED:** Remove victim to fresh air and keep at rest in a position comfortable for breathing.

IF exposed or you feel unwell: Call a POISON CENTER or doctor/physician.

# Generator

## Acid Activator

A concentrated GRAS acid blend for use in the generation of chlorine dioxide and pH reduction of poultry and livestock drinking water.

**Contains Copper Sulfate**

### Directions for use:

pH reduction - Apply using a metering or volumetric pump to achieve desired final water pH. If creating a stock solution, ensure that fresh solution is prepared daily.

Chlorine Dioxide Generation – When used to acidify sodium chlorite (a chlorine dioxide precursor), Generator creates a chlorine dioxide concentrate used to control non-pathogenic bacteria, taste and odor in poultry and livestock drinking water. Consult your MWI Technical Sales Representative on proper chlorine dioxide generation and application methods.
