

PPE Recommendations and Examples for Peracetic Acid

- **Compatible Glove Material** - Nitrile or Neoprene (length and thickness of the gloves will depend on the employee's type of exposure)
 - <https://www.ansell.com/us/en/products/alphatec-solvex-37-175>
 - <https://www.ansell.com/us/en/products/neoprene-29-865>
- **Compatible Boot Material**
 - Neoprene -Best
 - Rubber
- **Respirator**
 - Full-face air purifying respirator
 - Acid gas / organic vapor cartridges
 - It is not recommended that employees respond to spills, using an air purifying respirator, unless the exposure level is determined. Protection could be inadequate. SCBA with fully encapsulated suit would be appropriate if exposure levels are unknown.
- **Protective Clothing**
 - Tychem 4000
