

REFLEX

EPA REG. NO. 63838-12

FOR DAIRIES

- PREVENT MILKSTONE
- DOSE BY CONDUCTIVITY
- PASSES AOAC TEST
- REDUCE CIP PROCESS TIME
- EPA APPROVED
- SAFE FOR LAND DISCHARGE
- PHOSPHATE FREE
- NSF CERTIFIED

CIP cleaning of a brewery system can be an extremely water-intensive process, but an aggressive multi-step process is required to tackle its unique challenges. **Reflex** combines the power of an acid wash against scale and beerstone with the proven sanitizing efficacy of peracetic acid, all in one step.

Peracetic acid harnesses the power of oxygen to ensure the sanitation of your system without imparting odors or flavors to your product.

Fewer steps in your cleaning operations means fewer gallons of water - you'll save time, money, and the environment.

WATER USE COMPARISON
