

# ALCOHOL-FREE FOAMING

HAND SANITIZER

FDA NDC# 66284-005

## An Effective Alternative to Alcohol Hand Sanitizers

Enviro Tech's ALCOHOL-FREE FOAMING HAND SANITIZER has 0.14% Benzalkonium Chloride as the active ingredient — an alcohol-free antimicrobial sanitizer — used for 60+ years in surface cleaners, sterilizing agents, and more.

This hand sanitizer creates a quick-to-dry foam with moisturizing ingredients that sanitize your hands after each application and leaves them feeling soft and smooth. It's ideal for use when soap and water are not available.
