Subject: Label Amendment: Emerging Viral Pathogens Claim
Product Name: Peraspray
EPA Registration Number: 63838-15
Application Date: 07/15/2020
Decision Number: 564703

Dear Ms. Rodrigues:

The amended label referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act, as amended, is acceptable. This approval does not affect any conditions that were previously imposed on this registration. You continue to be subject to existing conditions on your registration and any deadlines connected with them.

A stamped copy of your labeling is enclosed for your records. This labeling supersedes all previously accepted labeling. You must submit one copy of the final printed labeling before you release the product for shipment with the new labeling. In accordance with 40 CFR 152.130(c), you may distribute or sell this product under the previously approved labeling for 18 months from the date of this letter. After 18 months, you may only distribute or sell this product if it bears this new revised labeling or subsequently approved labeling. "To distribute or sell" is defined under FIFRA section 2(gg) and its implementing regulation at 40 CFR 152.3.

Because you have opted to add statements pertaining to emerging viral pathogens to your label as described in the August 19, 2016, Guidance to Registrants: Process For Making Claims Against Emerging Viral Pathogens Not On EPA-Registered Disinfectant Labels ("Guidance"), https://www.epa.gov/sites/production/files/2016-09/documents/emerging_viral_pathogen_program_guidance_final_8_19_16_001_0.pdf, you are subject to the following additional terms of registration:

1. You may make statements pertaining to emerging viral pathogens only through the following communications outlets: technical literature distributed exclusively to health care facilities, physicians, nurses and public health officials, "1-800" consumer information services, social media sites and company websites (non-label related). These statements shall not appear on marketed (final print) product labels.

2. Your statements pertaining to emerging viral pathogens must adhere to the format approved on the Agency-accepted master label.
3. You may make statements pertaining to emerging viral pathogens only upon a disease outbreak that meets all the following criteria:
 - a. The causative organism must be a virus that causes an infectious disease that has appeared in a human or animal population in the U.S. for the first time, or that may have existed previously but is rapidly increasing in incidence or geographic range.
 - i. For human disease, the outbreak is listed in one of the following Centers for Disease Control (CDC) publications:
 - A. CDC Current Outbreak List for “U.S. Based Outbreaks” (www.cdc.gov/outbreaks),
 - B. CDC Current Outbreak List for “Outbreaks Affecting International Travelers” with an “Alert” or “Advisory” classification (www.cdc.gov/outbreaks) (also released through the CDC’s Health Alert Network (HAN) notification process)
 - C. Healthcare-Associated Infections (HAIs) Outbreaks and Patient Notifications page (www.cdc.gov/hai/outbreaks)
 - ii. For animal disease, the outbreak is identified as an infectious disease outbreak in animals within the U.S. on the World Organization for Animal Health (OIE) Weekly Disease Information page (www.oie.int/wahis_2/public/wahid.php/Diseaseinformation/WI).
 - A. The CDC or OIE has identified the taxonomy, including the viral family and/or species, of the pathogen and provides notice to the public of the identity of the emerging virus that is responsible for an infectious disease outbreak. Based on the taxonomy of the outbreak pathogen identified by the CDC or OEI, the pathogen's viral subgroup is (large non-enveloped, enveloped).
 - B. The virus can be transmitted via environmental surfaces (non-vector transmission), and environmental surface disinfection has been recommended by the CDC, OIE or EPA to control the spread of the pathogen.
4. You may begin communicating statements pertaining to emerging viral pathogens only upon CDC or OIE’s publication per term 3.a. of an outbreak of an emerging viral pathogen meeting all of the criteria of term 3. You must cease and remove all such non-label communications intended for consumers no later than 24 months after the original publication of the outbreak per term 3.a., unless the Agency issue written guidance to the contrary due to continued public health concerns. The emerging pathogen claim language may remain on the master label.

5. Terms from points 1 through 4 above shall become immediately void and ineffective if registration for use against Human Rhinovirus 42 (ATCC VR-338) is suspended or cancelled or no longer meets the criteria for a disinfectant claim (see EPA Product Performance Test Guideline 810.2200). In addition, terms B.1 through B.4 above shall become immediately void and ineffective upon your receipt of evidence of ineffectiveness against any pathogen in a less-resistant Spaulding category.

Should you wish to add/retain a reference to the company's website on your label, then please be aware that the website becomes labeling under the Federal Insecticide Fungicide and Rodenticide Act and is subject to review by the Agency. If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) list examples of statements EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product's label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA's Office of Enforcement and Compliance.

Your release for shipment of the product constitutes acceptance of these conditions. If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6. If you have any questions, you may contact the disinfectants list at disinfectantslist@epa.gov.

Sincerely,

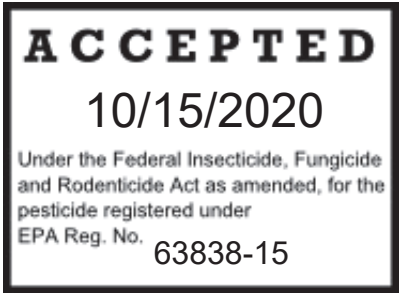

Demson Fuller, Product Manager 32
Regulatory Management Branch II
Antimicrobials Division (7510P)
Office of Pesticide Programs

PRECAUTIONARY STATEMENTS

Hazards to Humans & Domestic Animals

CAUTION: Causes moderate eye irritation. Harmful if swallowed or absorbed through skin. Do not get in eyes, on skin, or on clothing. Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet. Remove contaminated clothing and wash hands before reuse.

FIRST AID:

If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Seek medical attention if irritation persists.

If on skin: Wash affected area thoroughly with soap and water.

If swallowed: Have person drink several glasses of water or milk. Do not force an unconscious person to drink anything by mouth. DO NOT INDUCE VOMITING. Contact a physician or poison control center.

PHYSICAL OR CHEMICAL HAZARDS:

Avoid chlorine and strong reducing agents when using or storing this product. This product is incompatible with aldehydes, alcohols, thiols, and ammonia-containing products by reducing the effectiveness of Peraspray.

Residential/Household (Refillable bottles)

STORAGE AND DISPOSAL: Store out of reach of children or persons unfamiliar with its use. Store this product in a cool [dry] area, [away from direct sunlight] to avoid deterioration. Do not reuse or refill except as described in the directions for use. Offer for recycling if available or place in trash. Spilled product may be absorbed with sponge or mop and then rinsed with water.

Residential/Household (Bottles not intended to be refilled by the consumer)

STORAGE AND DISPOSAL: Store out of reach of children or persons unfamiliar with its use. Store this product in a cool [dry] area, [away from direct sunlight] to avoid deterioration. Nonrefillable container. Do not reuse or refill this container. Offer for recycling if available or place in trash. Spilled product may be absorbed with sponge or mop and then rinsed with water.

Commercial/Professional/Institutional (Refillable bottles)

STORAGE AND DISPOSAL: Do not contaminate water, food or feed by storage and disposal. **Storage:** Store out of reach of children or persons unfamiliar with its use. Store this product in a cool [dry] area, [away from direct sunlight] to avoid deterioration. Spilled product may be absorbed with sponge or mop and then rinsed with water. **Pesticide Disposal:** Wastes resulting from the use of this product must be disposed of on site or at an approved waste disposal facility. **Container Disposal:** Do not reuse or refill except as described in the directions for use. Offer for recycling if available or place in trash.

Commercial/Professional/Institutional (Bottles used to refill sprayer)

STORAGE AND DISPOSAL: Do not contaminate water, food or feed by storage and disposal. **Storage:** Store out of reach of children or persons unfamiliar with its use. Store this product in a cool [dry] area, [away from direct sunlight] to avoid deterioration. Spilled product may be absorbed with sponge or mop and then rinsed with water. **Pesticide Disposal:** Wastes resulting from the use of this product must be disposed of on site or at an approved waste disposal facility. **Container Disposal:** Do not reuse or refill except as described in the directions for use. Offer for recycling if available or place in trash.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

OPERATING SPRAYER

[Refill only with this product]
Alternate for refill bottle:
To Refill [Spray Bottles]:

Remove

1. Remove trigger sprayer or cap from empty bottle.

Pour

2. Unscrew cap on refill and pour contents directly into empty bottle.

Use

3. Replace trigger sprayer and use as you normally would.

-or-

[Remove trigger sprayer from empty bottle,] unscrew cap and transfer your sprayer to this bottle.

CLEANING

General: [Household/Kitchen/Floor] Cleaning; [Remove cooking ingredients and cooked food from areas to be cleaned.] Spray product straight onto soils and wipe clean [with a dry paper or lint-free cloth –or- sponge.] –or- [Spray soiled area, then wipe clean.] Repeat for visibly soiled areas.

Alternate for Direct Application of Refill Bottle:

Apply this product full strength onto soils and wipe clean [with a dry paper towel –or- [lint free] cloth –or- sponge –or- mop –or- rag.] Repeat for visibly soiled areas.

To Clean/Remove Soap Scum: Spray product onto soils and wipe clean [with a dry paper towel or lint-free cloth or sponge]. –or- Just spray on and wipe off [with a dry paper towel or lint-free cloth or sponge]. No scrubbing or rinsing is necessary. For best results, use a dry paper towel or lint-free cloth. Repeat for visibly soiled areas. For stubborn stains or visibly soiled areas or tougher jobs, allow product to penetrate [dirt and/or soap scum] before wiping. For best results, use regularly to prevent soap scum build up.

To Clean [Nonporous] Surfaces –and/or- Floors: [Spray soiled area, then wipe clean. –or- For spot cleaning, spray straight from bottle and wipe clean with damp sponge –or- mop.]

To Clean Toilets: To clean and deodorize toilet bowl, squirt liberally (1/2 cup) on toilet sides and upper bowl toilet rim. Swab –or- brush all surfaces thoroughly and flush.

Claims (all cleaning claims are optional text):

- An effective [non-food contact surface] cleaner for use in the kitchen, bathroom, bedroom, and other household areas
- Bleach Free [Formula] [Technology]
- Cleans and removes stains from washable floors
- Cleans everyday kitchen messes like dirt, grease and food stains
- Cleans tough messes

CLEANING CONTINUED

- Cuts [through] [tough] grease [and] [grime] [and] [messes] [quickly] [and easily] [without a trace] [or residue]
- Cuts –or- Cleans Grime in Kitchens and Bathrooms [Fast].
- Daily kitchen cleaner
- Deodorizes
- Easy clean
- Fast action [kitchen] [bathroom] cleaner
- Kitchen cleaning made easy
- Prevents odors –and/or- [dirt] [soap scum] [build up]
- Removes –and/or- cleans everyday kitchen messes
- Removes odors
- Special kitchen –and/or- bathroom cleaning formula
- Tough cleaning with a bleach-free scent

SANITATION –or- DEODORIZATION

To Deodorize –and/or- To Sanitize Non-Food Contact Surfaces: Spray until thoroughly wet. Let stand and remain visibly wet for 60 seconds then wipe. –or- Let stand and remain visibly wet for 60 seconds before wiping. For visibly soiled areas, a precleaning is required.

Alternate for Direct Application and Refill Bottle:

To Deodorize –and/or- To Sanitize Non-Food Contact Surfaces: Directly apply [this product] with a dry paper towel –or- [lint-free] cloth –or- sponge –or- mop –or- rag and wet surfaces completely. Let stand and remain visibly wet for 60 seconds then wipe. –or- Let stand and remain visibly wet for 60 seconds before wiping. For visibly soiled areas, a precleaning is required.

Claims (all sanitation –or- deodorization claims are optional text):

- An effective non-food contact surface sanitizer for use in the kitchen –and/or- [bathroom] [bedroom] [other household areas]
- Antibacterial [Formula]
- Cleans –or- Sanitizes washable kitchen –and/or- household surfaces –and/or- fixtures [throughout the home] Deodorizes –or- Eliminates food odors [left behind on kitchen surfaces] [after cooking]
- Deodorizes pet areas including pet beds –and/or- cages –and/or- kennels –and/or- cat litter boxes
- Deodorizes [washable] hard, nonporous surfaces
- Eliminates odors caused by bacteria [and non-fresh food]
- Kills [household] bacteria [and sanitizes without bleaching]
- Kills 99.9% of [household] bacteria [in 60 seconds]
- Kills odor causing bacteria in kitchens –or- bathroom
- One step cleaning and sanitizing
- Removes -or- Eliminates odors
- Sanitizer
- This product is a sanitizer for hard and nonporous, non-food contact area surfaces according to the method for Sanitizers – Non-Food Contact Surfaces, modified in the presence of 5% organic serum, [in 60 seconds] against: ***any organism from List 1***

Organisms: (List 1)

Staphylococcus aureus bacteria [Staph] [ATCC 6538], *Klebsiella pneumoniae* bacteria [ATCC 4352]

Use Sites: See Table 1

To Sanitize Hard, Non-porous Food Contact Surfaces: Spray until thoroughly wet. Let stand and remain visibly wet for 60 seconds then wipe. –or- Let stand and remain visibly wet for 60 seconds before wiping. For visibly soiled areas, a precleaning is required. Drain any excess solution. Do not rinse.

Claims (all sanitation claims are optional text):

- An institutional –and-or- industrial – and-or- household sanitizer for previously cleaned, non-porous food contact surfaced in dairies –and-or- wineries –and-or- breweries –and-or- food and beverage plants –and-or- poultry egg facilities–and-or- kitchens –and-or- bathrooms
- This product can be used in Federally inspected Meat –and-or- Poultry facilities as a sanitizer
- An effective hard, non-porous food contact surface sanitizer for use in the kitchen –and-or- [restaurants] – and-or- [meat facilities] –and-or- [poultry facilities]
- Antibacterial [Formula]
- Cleans–and-or- Sanitizes kitchens –and-or- [meat facilities] –and-or- [poultry facilities]
- Kills [household] bacteria [and sanitizes without bleaching]
- Kills 99.999% of [household] bacteria [in 60 seconds]
- Sanitizer
- This product is a sanitizer for hard, nonporous, food contact area surfaces according to the method for Sanitizers – Food Contact Sanitizer Test for Previously Cleaned Food-Contact Surfaces, [in 60 seconds] against: ***any organism from List 2***

To Sanitize Conveyors and Equipment for Meat, Poultry, Seafood, Fruit, Nuts and Vegetables: Apply to the return portion of the conveyor or equipment until thoroughly wet using coarse spray or similar means, so as to affect draining and prevent puddling. Let stand and remain visibly wet for 60 seconds then wipe. –or- Let stand and remain visibly wet for 60 seconds before wiping. For visibly soiled areas, a precleaning is required. Drain any excess solution. Do not rinse.

Claims (all sanitation claims are optional text):

- Peraspray is effective against the gram negative and gram positive organisms ***any organism from List 2***
- For use in the static or continuous sanitizing, washing –and-or- [rinsing] of conveyors, slicers, saws, and equipment.
- This product can be used in Federally inspected Meat –and-or- Poultry –and-or- Seafood–and-or- Fruit Processing –and-or- Nut Processing –and-or- Vegetable Processing Facilities as a sanitizer
- An effective hard, non-porous food contact surface sanitizer for use in meat facilities –and-or- poultry facilities –and-or- [seafood facilities] – and-or- [fruit processing facilities] – and-or- [nut processing facilities] – and-or- [vegetable processing facilities]
- Cleans –and-or- Sanitizes conveyors and equipment for meat facilities –and-or- poultry facilities – and-or- [seafood facilities] –and-or- [fruit processing facilities] –and-or- [nut processing facilities] –and-or- [vegetable processing facilities]
- Kills 99.999% of [household] bacteria [in 60 seconds]
- Sanitizer
- This product is a sanitizer for hard, nonporous, food contact area surfaces according to the method for Sanitizers – Food Contact Sanitizer Test for Previously Cleaned Food-Contact Surfaces, [in 60 seconds] against: ***any organism from List 2***

Organisms: (List 2)

Staphylococcus aureus bacteria [Staph] [ATCC 6538], *Escherichia coli* bacteria [*E. coli*] [ATCC 11229], *Salmonella enterica* bacteria [ATCC 10708], *Listeria monocytogenes* bacteria [ATCC 984]

Use Sites: See Table 1

To Sanitize Casing, Shell Eggs: To sanitize clean shell eggs intended for food –and-or- food products, spray with ready to use Peraspray solution. The solution must be equal to or warmer than the eggs, but not to exceed 130° F. Wet eggs thoroughly and allow to drain. Eggs that have been sanitized with this product may be broken for use in the manufacture of egg products without prior potable water rinse. Eggs must be reasonably dry before casing or breaking. The sanitizing solution must not be reused for sanitizing eggs. Allow to drain dry.

Fruit and Vegetable Uses: To remove bacterial decay and spoilage causing organisms, spray or dip raw or fresh fruits, vegetables, herbs, sprouts or spices. Apply this product for 60 seconds. A post application rinse is preferred but is optional.

DISINFECTION

To Disinfect: Spray until thoroughly wet. Let stand and remain visibly wet for 10 minutes then wipe. For visibly soiled areas, a precleaning is required.

All surfaces that come into contact with food must be rinsed with potable water. Do not use on glasses, dishes or utensils.

Alternate for Direct Application and Refill Bottle:

To Disinfect: Directly apply [this product] with a dry paper towel –or- [lint-free] cloth –or- sponge –or- mop –or- rag and wet surfaces completely. Let stand and remain visibly wet for 10 minutes then wipe. For visibly soiled areas, a precleaning is required.

Claims (all disinfection claims are optional text):

- An effective disinfectant for use in the kitchen –and/or- [bathroom] [bedroom] [other household areas]
- Antibacterial [formula]
- [Bacteria –and/or- virus-]-fighting –or- germ* fighting [formula]
- Cleaner and disinfectant in one
- Disinfectant [for homes]
- Disinfects the –or- your **list any Table 1 site/surface** [this season] [this flu season]
- Dries quickly
- Effective against **list any Organisms: List 3**
- Fight[s] –or- reduce the spread of germs* on hard, non-porous surfaces
- Kills [99.9% of] [common household] [kitchen] [bathroom] bacteria
- Kills [99.9%] **list any Organisms: List 3**
- Kill[s] –and/or- eliminate[s] –and/or- disinfect[s] –and/or- destroy[s] - and/or- remove[s] –and/or- fight[s] [99.9% of] [the] {[bacteria –and/or- viruses] [and other germs]} –or- germs* {[commonly] found in –or- on [the] [**list and Table 1 use site/surface**]
- Kill[s] –and/or- eliminate[s] –and/or- disinfect[s] –and/or- destroy[s] - and/or- remove[s] –and/or- fight[s] [99.9% of] **list any Organisms: List 3** [commonly] found in –or- on [the] [**list and Table 1 use site/surface**]
- Leaves surfaces [sanitary] [disinfected]
- Multi-surface [disinfectant]

Germicidal* against the following [organisms]: -or- [This product] kills the following [organisms]: -or- Disinfects against the following [organisms]:

Organisms: (List 3)

Salmonella enterica bacteria [ATCC 10708], *Staphylococcus aureus* bacteria [Staph] [ATCC 6538], *Pseudomonas aeruginosa* bacteria [ATCC 15442], *Human Rhinovirus 42* [ATCC VR-338] [The Common Cold], *Influenza A virus*

Additional Claims:

- This product has demonstrated effectiveness against *Influenza A virus (H1N1)* and is expected to inactivate all *Influenza A* viruses including Pandemic 2009 [formerly called swine flu] *Influenza A virus (H1N1)*.
- Kills Pandemic 2009 *Influenza A virus (H1N1)* [formerly called swine flu].

GENERAL CLAIM
(all general claims are optional text)

Scent descriptors:

- Bleach-free Scent
- Clean [Fresh] Scent

Additional descriptors (non-disinfectant-related):

- Bleach Free
- Chlorine-Free [Formula]
- Clear Formula
- Deep Cleaning
- Dye Free [and Fragrance Free]
- Easy To Use
- Fresh Scent
- Great for everyday use [in the kitchen] [in the bathroom]
- Leaves your –or- my home smelling clean –or- fresh
- No Chlorine
- No mixing
- Non-abrasive formula
- Non Chlorine Formula
- Perfume-Free
- Recyclable bottle
- Trigger Spray
- Versatile
- Works on a wide range of [household] [kitchen] [bathroom] [bedroom] surfaces
- Works quickly

Emerging Viral Pathogens

This product qualifies for emerging viral pathogen claims per the EPA's "Guidance to Registrants: Process for Making Claims Against Emerging Viral Pathogens not on EPA-Registered Disinfectant Labels" when used in accordance with the appropriate use directions indicated below.

This product meets the criteria to make claims against certain emerging viral pathogens from the following viral categories:

- Enveloped viruses
- Large Non-Enveloped Viruses

Statements shall adhere to the following format:

[Product name] has demonstrated effectiveness against viruses similar to [name of emerging virus] on hard, non-porous surfaces. Therefore, [product name] can be used against [name of emerging virus] when used in accordance with the directions for use against [name of supporting virus(es)] on [hard porous/non-porous surfaces]. Refer to the [CDC or OIE] website at [pathogen-specific website address] for additional information.

[Name of illness/outbreak] is caused by [name of emerging virus]. [Product name] kills similar viruses and can therefore be used against [name of emerging virus] when used in accordance with the directions for use against [name of supporting virus(es)] on [hard, porous/non-porous surfaces]. Refer to the [CDC or OIE] website at [pathogen-specific website address] for additional information.

<i>For an emerging viral pathogen that is a/an...</i>	<i>...follow the directions for use for the following organisms on the label:</i>
Enveloped virus	Human Rhinovirus 42 ATCC VR-338,
Large, non-enveloped virus	Human Rhinovirus 42 ATCC VR-338

(Note to the reviewer: The statements shall be made only through the following communications outlets: technical literature distributed exclusively to veterinarians, health care facilities, physicians, nurses and public health officials, "1-800" consumer information services, social media sites and company websites (non-label related). **These statements shall not appear on marketed (final print) product labels.**
