DANGERS-PELIGRO

Before Using this Product, Please Read This Entire Label Carefully.

KEEP OUT OF REACH OF CHILDREN

CAUTION

Siu usted no entienda la etiqueta, busque a alguien para que le explique el uso en detalle. (If you do not understand this label, find someone to explain it to you in detail.)

FIRST AID

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15

minutes. Hold eye open and rinse slowly and gently with water for 15

IF SWALLOWED: If on skin or clothing, remove contaminated clothing immediately if possible. Take small quantities to a

PHYSICIAN:

Probable mucosal damage may contraindicate the use of gastric lavage.

PRECAUTIONARY MEASURES AND DISPOSAL

DANGER CORROSIVE: Causes irreversible eye damage and skin burns. May be fatal if inhaled or absorbed through the skin. Harmful by ingestion and inhalation, but non-flammable. Do not induce vomiting unless told to do so by a poison control center or doctor.

For the control of soil borne diseases such as Fusarium, Phytophthora, Pythium, Verticillium, Thielaviopsis, and Basidiobolus, use this product only at a dilution rate of 1.9 fl oz per million gallons of water. This product can be used to suppress/control algae and slime formations in and around greenhouses. For the control of fish killing in the irrigation system or in spray tanks with pesticides, surfactants or fertilizers before contacting a federal or state permitting authority has been notified.

Foliage: This product may be used to cure or prevent bacterial and fungal diseases on growing vegetables, ornamentals and horticultural crops, including potatoes, cucumbers, melons, tobacco, pines, citrus, and other flowering plants. This product is also considered a soil fumigant used in the treatment of soil in conjunction with a NIOSH approved respirator with an organic vapor (OV) cartridge. This product may be used to control soil born diseases such as fusarium, phytophthora, pythium, verticillium, thielaviopsis, and basidiobolus.

Toxicity: Skin irritation and respiratory sensitization may occur in susceptible individuals. If these wastes cannot be disposed by use according to label instructions, all other disposal methods have been evaluated. An approved method of disposal is to dilute the mixture with water and disperse into the agricultural or Irrigation Water System.

Storage:

The requirements in this box apply to uses of this product that are not within the scope of the Worker Protection Standard, 40 CFR Part 170. This product is also considered a soil fumigant used in the treatment of soil in conjunction with a NIOSH approved respirator with an organic vapor (OV) cartridge.  This product may be used to control soil born diseases such as fusarium, phytophthora, pythium, verticillium, thielaviopsis, and basidiobolus.
