PERAGREEN 15%  
(ANTIMICROBIAL SOLUTION)

Peragreen 15% is a peracetic acid-based microbiocide developed for Bacteria, Fungi, Slime and Ooze Control in Fruit and Vegetable Process Water Systems and Agricultural Water Treatment Systems.

ACTIVE INGREDIENTS:
- Peroxyacetic Acid 15.0%
- Hydrogen Peroxide 22.0%

INERT INGREDIENTS:
- 83.0%

TOTAL:
100.0%

STORAGE AND DISPOSAL:
- Storage: Return the product to the original container after use. It has not been tested for long-term storage. It is not recommended to be stored for long periods. After use, discard the container, spray container, wash container with cold water and wash the container with a large volume of water. Avoid damage to containers. Keep container closed during storage.
- Disposal: Do not discharge this product into drains or sewers. It shall be managed at a hazardous waste facility; this is for recycling.

Note to Reviewer: In accordance with 40 CFR 161.6(b), all first aid statements, as prescribed, will appear on the front panel of the product label.

FIRST AID:

IF IN EYES:
- Hold eye open and rinse slowly and gently with water for 15-20 minutes.
- If irritation persists, seek medical attention.

IF IN SKIN OR CLOTHING:
- Rinse skin immediately with plenty of water for 15-20 minutes.

IF INHALED:
- Remove victim to fresh air. If breathing is difficult, give oxygen.
- If breathing stops, call for emergency medical assistance.

IF SWALLOWED:
- Do not induce vomiting unless instructed to do so by a poison center or doctor.
- Do not give anything by mouth to an unconscious person.

Note: All volumes given in ounces are U.S. dry ounces. When used according to the directions for use, this product is compatible with stainless steel, stainless steel or plastic. If used to sterilize stainless steel or plastic contact materials, it is recommended that you follow the manufacturer's instructions for cleaning/maintaining PPE. Discard clothing and other absorbent materials that have been drenched or contaminated with this product.

AGRICULTURAL USE REQUIREMENTS:

The requirements in this box apply to use of this product for use within the scope of the Water Protection Standard for agricultural water treatment systems. This product may be used for agricultural water treatment systems that use: contact time, crop surface, or agricultural water treatment systems.

AGRICULTURAL TREATMENT OF FRUIT AND VEGETABLE PROCESS WATER SYSTEMS:

(Not for Use in California) This product may be used for the control of damping-off, root disease and stem rot disease caused by Pythium root rot, Rhizoctonia root-rot, leaf spot, Pink Snow Mold - Thielaviopsis basicola and Thielaviopsis conglutinans. Contact time of 60 seconds is recommended to insure effectiveness.

treat crops and vegetables as follows:

- Crops:
  - Field vegetables: Use this product for the control of damping-off, root disease and stem rot disease caused by Pythium root rot, Rhizoctonia root-rot, leaf spot, Pink Snow Mold - Thielaviopsis basicola and Thielaviopsis conglutinans.

- Foliage:
  - Foliage applications: Use this product for the control of damping-off, root disease and stem rot disease caused by Pythium root rot, Rhizoctonia root-rot, leaf spot, Pink Snow Mold - Thielaviopsis basicola and Thielaviopsis conglutinans.

- Seed Treatment:
  - Soil application: Use this product for the control of damping-off, root disease and stem rot disease caused by Pythium root rot, Rhizoctonia root-rot, leaf spot, Pink Snow Mold - Thielaviopsis basicola and Thielaviopsis conglutinans.

To control, treat or suppress the bacterial and fungal diseases: silver scurf, late blight, pink rot, early blight, bacterial soft rot. This product can be used in greenhouses, where it is recommended for the treatment of soil, foliage, and seedling.
