APPLICATIONS

PHYSICAL PROPERTIES

Irrigation Line Cleaner is a premium drip line cleaning product formulated to control carbonate-based scale, metals, mineral deposits, and slime formation.

This product can be injected into irrigation lines to effectively treat clogs formed by slime and hard water deposits. It can be used in various treatment programs, such as continuous or shock doses, to sustain irrigation water that is free of undesired mineral deposits and slime build-up.

Color	Colorless, clear liquid
Scent	Odorless
Density (20 °C)	1.22 g/mL (10.16 lbs/gal)
pH (1%)	<2
Solubility in water	100%
Biodegradability	100%

DIRECTIONS FOR USE

For shock treatment when irrigation lines are clogged or there is visible slime build-up use **Irrigation Line Cleaner** at a rate of 1 gal per 1,000 gallons of irrigation water. For best effect, hold product in irrigation lines for up to 12 hours and then flush to remove foreign material.

For bi-weekly treatment to inhibit slime or hard water build-up, use this product at a rate of 1 gallon per 3,000 gallons of irrigation water. Contain product in the line for 12 hours and flush irrigation system to remove foreign material.

For continuous treatment to inhibit slime or hard water build-up, inject this product at a rate of 1 gallon per 20,000-40,000 gallons of irrigation water. Dose at this rate continuously to provide effective and long-lasting water treatment.

PACKAGING

This product is available in 55 gal drums, 265 gal totes, and 330 gal totes. Other sizes available on request.

IMPORTANT

Read and understand label and Safety Data Sheet (SDS) for complete listing of hazards, precautions, first aid statements, and storage and handling information. SDS are available from the distributor of this product.
